PLEASE READ THE FOLLOWING INSTRUCTIONS THOROUGHLY BEFORE INSTALLING AND OPERATING THIS LED INTERIOR KIT

- (4) 9” Tubes
- Control Box
- Double Sided Tape
- Screws
- Zip Ties
- Cigarette Power Adapter

⚠WARNING: This interior lighting kit must be installed in a dry location! Having this kit exposed to water or the elements will cause the kit to fail. Any water damage or corrosion to this kit will VOID all warranties.

1. Test your kit for full functionality before installation by simply plugging the cigarette power adapter into your cigarette lighter. After testing the kit for full functionality, unplug the cigarette power adapter and continue with the installation.
2. Disconnect the negative terminal of your vehicle’s battery.
3. Mount the tubes to your desired location with the included screws. If you do not want to use the supplied screws, you can use the included zip ties. Make sure the tube and the lead power wire do not come in contact with any moving parts, for example, the pedals, steering column, and seat rails.
4. Mount the control box in a readily accessible area free of heat and moisture using the supplied adhesive tape.
5. Once the control box and tubes are mounted, secure and hide all of the tube wires with zip ties.
 - **TECH TIP :** To best hide the wires, remove the interior panels!
6. **Select your Power Option:**
 - **Option 1- Plug and Play:** It’s as easy as it sounds, simply insert the cigarette power adapter into your cigarette lighter for power.
 - **Option 2- Hardwire Installation:**
 1. Use wire cutters to cut the included cigarette power adapter off right before the black connector.
 2. Use wire strippers to strip the ends of the red and black wires.
 3. Connect the red power wire to a positive 12-volt source such as your positive battery terminal. If the wires are not long enough, extend them using 16 or 18 gauge automotive-grade wire and relocate the in-line fuse within 6” of the battery.
 4. Connect the black ground wire to an unpainted metal ground such as a chassis ground or your negative battery terminal. Do not run the wires through the door jamb, the wire can be pinched or cut and will void all warranties.
7. Reconnect the negative terminal of your vehicle’s battery and test the function of your product.
